Answer: 4♥

Partner's rebid has shown that he has 5+ hearts. We have an 8+ card fit and enough points for game (12 HCP + 3 shortage points).

Answer: 2♠

Best to give preference to partner's first suit. A preference bid does not necessarily show 3 card support. A 5-2 trump suit fit will usually play better than a 4-3 trump suit fit as declarer is less likely to lose control of trumps.

Answer: 3♠

With 11 points we jump to $3 \triangleq$ showing an invitational hand (10-12 points). With 13 points we would jump to $4 \triangleq$.

Answer: 2♥

With 6 reasonable hearts we repeat them at the lowest level showing 6-9 points. Responder must not rebid his suit with a poor 6 card suit or with any 5 card suit. Opener has shown at least 5-4 in his two bid suits so may have only one card (or none!) in responder's suit.

Answer: 1NT

With the stopper in diamonds and flat shape with nothing to ruff, 1NT is probably better than $2^{\frac{4}{3}}$.

1NT + 1 will score better than 2♣

Answer: 3NT

Enough points for game and we have a stopper in the unbid suit.

Answer: 2♠

Showing 6-9 points, the same as a raise on the first round of bidding.

Answer: Pass

Opener has 5+ diamonds and 4+ clubs. He has denied 4 hearts and 4 spades. He also has 12-18 points (with 19 points he would have jumped to $3\frac{4}{2}$. The partnership does not have enough points for game. You have an 8+ card club fit so you pass. This is called a preference pass. You prefer partner's clubs.
